Quick Overview

The book on Management of the High-Risk Infant Beyond Survival is a practical handbook for neonatologists, pediatricians and therapists involved in the care of newborn. The book includes a chapter on occupational therapy which has explicit instructions with many figures, showing the specific exercises. This book is a practical guide with many photographs for those who want to start a follow-up program.

Key Features

- A practical and detailed guide on how to do a close follow-up of the high-risk infant, right from the time of discharge from the neonatal intensive care unit (NICU).
- Describes not only the methods of diagnosis and the various tests used for it in detail, but also suggests the therapeutic regime.
- Deals with physical, mental, cognitive, visual, auditory and orthopedic problems encountered in such babies.
- Provides guidelines for their management, based on the vast experience of the author and her colleagues in this field.

Target Audience

A ready reckoner for pediatricians, neonatologists and therapists.

Management of the High Risk Infant Beyond Survival

Salient Features

- A practical and detailed guide on how to do a close follow-up of the 'high-risk' infant, right from the time of discharge from the neonatal intensive care unit (NICU)
- Describes not only the methods of diagnosis and the various tests used for it in detail, but also suggests the therapeutic regime
- Deals with physical, mental, cognitive, visual, auditory and orthopedic problems encountered in such babies
- Provides guidelines for their management, based on the vast experience of the author and her colleagues in this field
- A ready-reckoner for pediatricians, neonatologists and therapists.

Sudha Chaudhari is a Consultant, Department of Pediatrics, Terre Des Hommes Rehabilitation and Morris Child Development Centre, King Edward Memorial (KEM) Hospital, Pune, Maharashtra, India for the last 45 years. Her research study, "Pune Low Birth Weight Study—Birth to 22 Years" is the longest follow-up study in India. This book chronicles her insight into neurodevelopment of 'high-risk' infants and her 40 years' experience gained at the Terre Des Hommes Rehabilitation and Morris Child Development Centre, KEM Hospital, Pune. Dr Barbara Schmidt, a renowned neonatologist from USA, called her a "Pioneer in Neonatal Follow-up in India."
